

This is in response to Montgomery County, MD attempt to enforce a vaccine passport mandate. How can you ask a business to enforce discrimination against the unvaccinated? This isn't something that is nationwide or even statewide. So when a customer comes in from a neighboring county we are forced to refuse service? That is absurd and unacceptable. How can you expect normal hard working civilians to have confrontations with people in the name of discrimination? Nothing about this makes any sense and will just cause real life problems. After being one of the top ranked restaurants in Montgomery County for over four decades these kind of policies is what will force us to move. Even though our entire staff is fully vaccinated, we are adamantly against vaccine passports. I beg of you not to try to force us to discriminate against any class of citizen.
